SUMMARY

Full Stack Developer with 3+ years building end-to-end SaaS platforms, REST APIs, and cloud-native backend systems for B2B startups, currently delivering cloud engineering consulting at EY. Proficient across the stack — Node.js, Express.js, React.js, Next.js, MongoDB — with hands-on experience designing serverless architectures (AWS Lambda), containerized deployments (Docker), and multi-cloud environments (AWS, GCP). Comfortable owning a feature from database schema and API design through to a polished, production-ready UI. Delivered measurable results: 50% user engagement growth, 40% efficiency gains, and 35% faster ticket resolution.

EXPERIENCE

Senior Consultant — Ernst & Young LLP (EY) Hyderabad, India | Jun 2026 – Present

- Advise enterprise clients on cloud modernization initiatives, designing serverless architectures on AWS Lambda to replace legacy batch workflows.
- Build and deploy Python-based data processing and automation pipelines integrated with client AWS environments, improving processing turnaround time.
- Develop backend services and internal tooling in Node.js to support client delivery teams and streamline reporting across engagements.
- Partner with cross-functional consulting and engineering teams to scope, estimate, and deliver cloud engineering workstreams for client accounts.

Stack: *AWS Lambda, Python, Node.js, AWS, Docker, Git*

Software Development Engineer — TechMonk Ecom Solutions Pvt. Ltd Mumbai, India | Jun 2025 – Mar 2026

- Built the Agent Builder feature — REST APIs + React UI for configuring bots, assigning agents, and setting deployment channels (web, WhatsApp, etc.).
- Integrated Exotel telephony with a one-click call button on ticket pages, letting support staff call customers without leaving the platform.
- Overhauled lead management with custom forms and round-robin assignment, raising distribution efficiency by 40%.
- Fixed critical production bugs and extracted shared utilities, cutting recurring defects by 25%.

Stack: *Node.js, TypeScript, React.js, Next.js, MongoDB, Express.js, Redis, Docker, GCP, AWS, JWT, Python, Git*

Software Developer — Sustally Technologies Private Limited Remote, India | Oct 2023 – Feb 2025

- Led frontend build of a public sustainability dashboard (Next.js + Tailwind CSS) with QR-based real-time metrics — user engagement up 50%.
- Built REST APIs for Excel bulk import/export via Excel.js, reducing manual reporting errors by 30%.
- Shipped mobile-first data entry platforms that auto-aggregate daily uploads into monthly/quarterly reports, saving 20% reporting time.
- Refactored React and Node.js modules to eliminate bottlenecks, keeping the codebase modular and testable.

Stack: *React.js, Next.js, TypeScript, Node.js, MongoDB, Express.js, Tailwind CSS, MUI, Python, Docker, AWS, JWT, Git*

RPA Developer — GXS India Technology Centre Pvt. Ltd (OpenText) Bengaluru, India | Dec 2022 – Jun 2023

- Automated 20+ enterprise web form workflows with UiPath, improving data accuracy for business-critical operations.
- Built automation pipelines with FTP scripting, XML parsing, and web scraping — raised throughput by 30%, cut execution time by 20%.

Stack: *UiPath, Python, XML, JSON, FTP, Jira, Agile*

EDUCATION

B.Tech — Computer Science & Engineering May 2023
Vel Tech R&D Institute of Science and Technology, Chennai · CGPA: 9.21 / 10 · First Class with Distinction

Intermediate (12th) — Toppers Junior College March 2019
920 / 1000 · A Grade · Telangana State Board of Intermediate Education

SSC (10th) — Pace School, Rukminipuri March 2017
CGPA: 8.7 / 10 · Board of Secondary Education, Telangana State

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java
Backend: Node.js, Express.js, REST APIs, MVC, JWT Auth
Frontend: React.js, Next.js, Tailwind CSS, MUI, Redux, Framer Motion
Cloud & DevOps: AWS (Lambda, EC2, S3), GCP, Docker, Serverless Architecture, Git/CI-friendly workflows
Databases & Tools: MongoDB, MySQL, Redis, Postman, Playwright, Jira, UiPath

PROJECTS

- HeyDJ — Real-time Spotify QR voting app; votes reorder the DJ queue live. (heydj-tau.vercel.app)
- Nomad Navigator — AI trip planner with Google Maps, Skyscanner & OpenWeather APIs, live collab and budgeting. (nomad-navigator-8quy.vercel.app)

AWARDS & CERTIFICATIONS

Runner-Up Codeathon '22 & PI Pro (Vel Tech) · GFG Institute Rank #24 of 2,000+ · 300+ problems on LeetCode & GFG · Mentor at Google Developer Student Club (GDSC)

Certs: Complete Web Developer Bootcamp (Udemy) · React – The Complete Guide (Udemy) · Machine Learning (Stanford/Coursera) · AWS: Intro to Cloud
